

Located in scenic Logan, Utah, Apogee Instruments is a developer and manufacturer of innovative electronic sensors used worldwide for meteorological, agricultural, and renewable energy applications. If you enjoy working hard on a variety of scientific projects, having great coworkers, and being part of a company that truly cares about its employees, please review the job requirements below and submit your resume.

RESEARCH ASSOCIATE

Requirements:

- Understanding of the physical processes in the soil-plant-atmosphere continuum and a background in the instrumentation and measurement techniques used to quantify these processes
- Bachelor's degree in disciplines such as Environmental Biophysics, Plant Physiology, Soil Physics, or Plant Ecology is required with an M.S. degree preferred
- Excellent written and verbal communication skills, good computer skills, and experience in data analysis and graphical data summarization
- Ability to solve technical challenges while working with other scientists, engineers, and technicians
- Working knowledge of basic electronics (desirable)
- Enthusiasm for working at a small, but fast-growing company
- Creativity and aptitude for problem-solving

Responsibilities:

- Work with scientists and engineers in the development and testing of new instrumentation, including data collection, analysis, interpretation, and summarization, with conclusions via written reports, graphs, and presentations
- Research applications for existing and new product development
- Assist with writing marketing literature, application notes, and user manuals
- Reinforce the company's commitment to providing quality instrumentation to the scientific community at a reasonable cost

Compensation is commensurate with experience with an anticipated salary range of \$45,000-\$75,000 and a generous compensation package including health insurance, retirement, paid holidays, compensated leave, and profit sharing.
