

Located in Logan, Utah, Apogee Instruments is a developer and manufacturer of innovative sensors used worldwide for meteorological, agricultural, and renewable energy applications. If you enjoy working hard on a variety of projects, having great coworkers, and being part of a small growing company, please review the job requirements below for:

## **SOFTWARE ENGINEER**

## **Technical Qualifications:**

- B.S. degree in **Computer Science**, **Computer Engineering**, or completion of an applicable accredited program.
- Experience with C, C++, C#, Swift, Java, or Python.
- Willingness and ability to learn new platforms and languages.
- Able to handle multiple concurrent projects.
- Experience creating intuitive user interfaces.
- Understanding of and experience using Git or other source-control software.
- Experience taking a project from start to completion.
- Skills in troubleshooting and debugging.
- Experience with webapp or database development is a bonus.
- Experience with embedded firmware is a bonus.

## Job Responsibilities:

- Design, develop, and maintain small applications for Windows, macOS, Android, and iOS.
- Design, develop, and support in-house manufacturing and calibration software.
- Stay up to date on new technologies, trends, and best practices.
- Review product requirements, provide feedback, and contribute to project planning activities.
- Summarize work with written reports, tables, graphs, and presentations as required.
- Assist with marketing efforts (material for webpage, user manuals, website coding, etc.).

This is a full-time position with a generous benefits package including health insurance, retirement, paid holidays, compensated leave, flexible hours, maternity/paternity, profit sharing, gym reimbursement, a nice building to work in, a computer to sit at, a water cooler to share, and some (above average?) co-workers. Compensation depends on experience.

Interested? We are interested in you too, if:

- You work well with others and productively on your own, without needing supervision.
- You are artistically and creatively minded, with an eye for detail.
- You are a self-starter, motivated to improve, and eager to learn.
- Seeing your work used on a global scale sounds awesome.
- You can communicate clearly and effectively.
- You have the ability (and discipline) to set and meet deadlines.
- You consider form and function a requirement, not a binary choice.
- You prefer working for a small company.

If the above points describe you well, you meet the qualifications, and the job description sounds right up your alley, then you should apply! Please send a cover letter, resume, and references to <a href="mailto:ryan.lindsley@apogeeinstruments.com">ryan.lindsley@apogeeinstruments.com</a>.
